

WHITE PAPER

ARENA VERSE

INTRODUCTION

In the wake of the growth of NFT and the popularisation of the 'play-to-earn' financial model decentralized games, the DeFi gaming sector has been growing and gaining in popularity. The capitalisation of the top play-to-earn tokens are in the hundreds of millions of dollars, indicating the rapid growth of the industry. The NFT market largely incorporates these impressive financials, and the gaming industry has caught on to the trend towards the use of non-fungible tokens and their practical application in various gaming scenarios.

The GameFi sector is an increasingly dynamic, fluid and competitive market where games are combined with the topic of finance, making the process of generating income from a very complex activity into a gamified process that is accessible to everyone. According to the latest statistics, GameFi has tremendous promise, and the phenomenon will grow rapidly with the influx of new projects.

The new high-yield mechanisms of the innovative decentralised financial sector are helping to address the growing economic hardship among people around the world. Combined with addictive gameplay, this creates a 'play to earn' model that is not only fun, but also profitable.

CONCEPT

ArenaVerse is a unique gaming project with all the benefits of DeFi and is designed to provide a high-quality gaming experience. The complex approach to the economic model of the project is aimed at using multiple mechanisms to increase the value of the ArenaVerse token for all players.

In ArenaVerse, players will then use their characters to battle other players in an RPG-style action game. While playing the game, players will automatically participate in our player-based economy, collecting tokens as rewards for completing quests and winning battles.

Members will be able to trade NFTs and buy special powers for their characters. A Proof of Stake (PoS) consensus algorithm will allow users to stake gaming NFTs and earn rewards in the ArenaVerse ecosystem token.

TECHNOLOGY

ArenaVerse is an NFT-based game that is part of the 'play-to-earn' metaverse, built on the Binance Smart Chain (BSC) blockchain. The main function is performed by BEP-1155 smart contracts - this standard allows the BEP-20 and BEP-721 standards to be combined on one blockchain, thus combining in-game fungible and non-fungible tokens.

One of the game's key technologies is NFT (non-fungible token). ArenaVerse allows to use them to purchase special character powers and further use them in the game. NFTs are gaming items with a real value. Their value increases over time, and the player can easily buy/sell them or use them in the game for their intended purpose.

In order to implement game mechanics that combine DeFi and NFT technologies, an internal utility game token \$ARENAVERSE has been released. The token plays a major role in the game and is intended to be used as in-game currency. The token is used to pay out accrued rewards, to purchase and monetise NFT characters.

TOKENOMICS

Distribution:

Total Supply	100%	1,000,000,000
Circulating supply	72%	720,000,000
Gaming Pool	5%	50,000,000
Influencers Pool	10%	100,000,000
Advisors	3%	30,000,000
Team (Locked for 1 year)	10%	100,000,000

The Tokenomics are set up to create a sustainable project for the long-term. The team will hold 10% of the tokens which will have a vesting period of 1 year. Distributing tokens in this proportion will help ensure a smooth and steady increase in supply.

Influencers pool will be used to scale and promote the project by collaborating with major brands and introducing new technical solutions to improve the ArenaVerse user experience.

Tax structure:

10% buy	12% sell
1% Liquidity	1% Liquidity
1% distribution to holders	2% distribution to holders
5% Marketing	5% Marketing
3% Game development	4% Game development

The tax structure can be changed - this function is built into the contract, so that the level of flexibility can be applied at any time throughout the life of the project.

ROADMAP

PHASE I (Q4 2021)

NFTS FOR SKINS WITH DIVIDEND UTILITIES RELEASE
UTILITY TOKEN RELEASE
INTENSE MARKETING CAMPAIGN
FULL AUDIT & KYC
PUBLIC PRESALE
PANCAKESWAP LISTING
LISTING ON COINMARKETCAP AND COINGECKO

PHASE II (Q1 2022)

ARENAVERSE GAME (ALPHA) RELEASE
PLAY-TO-EARN AND ADDITIONAL MINIGAMES
IN-GAME CLUBS AND POLITICS
ONGOING MASSIVE MARKETING CAMPAIGN
PROJECT PARTNERSHIP ADVERTISEMENT

PHASE III (Q2 2022)

ARENAVERSE GAME (BETA) RELEASE
IN-GAME DAO AND POLITICS RELEASE
MAP EXPANSION
NFT MARKETPLACE FOR SKINS DEVELOPED
SERVER UPGRADES
MAJOR PVP UPDATES & MINIGAMES

PHASE IV (Q3 2022)

CROSS-CHAIN EXPANSION AND INTEGRATION
NFT MARKETPLACE FOR SKINS RELEASE
PLAYER LEADERBOARD COMPETITIONS
MASSIVE MARKETING CAMPAIGN
CEX LISTING

TEAM

ArenaVerse was founded by a team of blockchain gaming industry veterans from around the world. They also shared a deep interest in the evolving crypto space and a vision to create their own secure gaming ecosystem.

The project team is united by a shared love of competitive game shows and a desire to create innovative and exciting projects that push the boundaries of DeFi technology and metaverse.

CONCLUSION

Increasingly, many blockchain-based gaming projects turn out to be fraudulent. Most of the revenues from such games go into the developers' pockets, and the players who have invested their money in them get nothing in return.

The goal of ArenaVerse is to create a high-quality product and build a fair ecosystem for project participants. The players should own their assets and have the full right to dispose of them. Any value contributed to the project will be rewarded.
